Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non obvious), or to be industrially applicable have not been examined in respect of:

☐ the entire international application

☒ claims Nos. 7

because:

☒ the said international application, or the said claims Nos. 7
relate to the following subject matter which does not require an international preliminary examination (*specify*):

See PCT Rule 67.1.(iv): Methods for treatment of the human or animal body by surgery or therapy, as well as diagnostic methods.

☐ the description, claims or drawings (*indicate particular elements below*) or said claims Nos. _____
are so unclear that no meaningful opinion could be formed (*specify*):

☐ the claims, or said claims Nos. _____ are so inadequately supported
by the description that no meaningful opinion could be formed.

☐ no international search report has been established for said claims Nos. _____

☐ the nucleotide and/or amino acid sequence listing does not comply with the standard provided for in Annex C of the
Administrative Instructions in that:

the written form

☐ has not been furnished

☐ does not comply with the standard

the computer readable form

☐ has not been furnished

☐ does not comply with the standard

☐ the tables related to the nucleotide and/or amino acid sequence listing, if in computer readable form only, do not comply with
the technical requirements provided for in the Annex C-bis of the Administrative Instructions.

☐ See Supplemental Box for further details.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/SE2003/001275

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	<u>1-6, 8-11</u>	YES
	Claims		NO
Inventive step (IS)	Claims		YES
	Claims	<u>1-6, 8-11</u>	NO
Industrial applicability (IA)	Claims	<u>1-6, 8-11</u>	YES
	Claims		NO

2. Citations and explanations (Rule 70.7)

Cited documents:

D1) WO 9822457 A1

The document D1 is regarded as being the closest prior art and discloses compounds that are overlapping with the compounds of the present claims. These compounds are used for the treatment of asthma and allergic rhinitis (see claim 43).

However, no compounds falling under the present claims have been exemplified.

Thus, the invention according to present claims 1-6 and 8-11 is novel.

The compounds according to the claimed invention differ from the closest exemplified compounds (see examples 3 and 4) only in that the substituent on the pyridine ring is other than amino and the substituent R2 is at least partly saturated.

The known structurally related compounds from D1 are said to act on TNF-alpha or interleukin mediated diseases instead of being inhibitors of the kinase Itk, although they are all used for treatment of asthma and allergic rhinitis.

The applicant has not shown that the structural differences render the claimed compounds unexpected effects in comparison with the known compounds.

It is considered obvious to a person skilled in the art to modify structurally similar compounds to obtain the claimed compounds and come to the conclusion that they will have the same activity.

Thus, claims 1-6 and 8-11 are considered to fulfil the requirement of novelty, but not that of inventive step.
